DETAILED ACTION

1. Claims 37-35 and 67-77 are pending and examined.
2. Applicants' submission of "Request for continued examination transmittal" and information disclosure statement filed on 4/21/03, Paper Nos. 24 and 25, respectively, is acknowledged.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 37 and 57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Collison et al. (AA). Collison et al teaches a vector comprising a nucleic acid encoding a feline CD80 ligand (Claim 16), CD86 ligand (Claim 18), CD28 receptor (Claim 20), or CTLA-4 receptor (Claim 22). Collison et al teaches a plasmid vector construct but not a recombinant virus; however, it would be *prima facie* obvious for one of ordinary skill in the art at the time the invention was made to construct either construct for the purpose of encoding a foreign nucleic acid.
5. Claims 38-56, 58-65 and 67-77 are allowable.
6. Claims 37 and 57 are not allowed.
